**To Future Triton Water Customers**

Emerald Coast Utilities would like to commend Triton Water Technologies on their excellent performance and service. It has been a pleasure working with Triton throughout the course of this project which consisted of over 81,000 water meter installations. Lance Davis and his staff were extremely professional at all times and delivered quality work on time every time. Triton has gone out of their way to meet or exceed our expectations in every aspect of this Water Meter Infrastructure Improvement contract.

The contract entered into with Triton was for the exchange of approximately 72,500 meters, sizes 5/8" thru 1 1/2" to be completed in 18 months. Not only did they meet the goal of 72,500 meters, but we added an additional 9,000 meters to the contract and still completed this project in 15 months, well under the contract specifications.

In closing, Emerald Coast Utilities would like to simply say thanks for a job well done. This project has been a great experience and we look forward to working with Triton again in the future if the opportunity presents itself. We would also strongly recommend Triton Water Technologies to any other utility considering an Infrastructure Improvement project.

Sincerely,

Stephen A. Burgess  
Deputy Executive Director- Customer Service
