July 20, 2006

The City of Mulberry would like to take this opportunity to thank Adam Corwin and his staff from Triton Water Technologies. Our Public Works Department as well as the entire City Hall staff had the pleasure of working closely with Adam and his crew. We found an atmosphere of professionalism in every aspect of the project. As time passes we realize how much our previously monumental meter reading problems have decreased. Prior to Adam's work in Mulberry we had a five member crew working three days a month to acquire the same results that a single meter reader is presently able to accomplish in one day. The cost and time savings achieved through work done by Triton Water Technologies are allowing us to concentrate on other projects. Also, the accuracy of the newly installed system has surpassed our critics' expectations.

In closing, the City of Mulberry would like to extend our thanks and appreciation to Triton Water Technologies for their excellent work and wish for it to continue.

Sincerely,

David Bloome  
Public Works Director
